About Me.

14+ years building software, 7 in crypto. After years shipping production systems hands-on, I now build with AI as a force multiplier - I split work across AI agents and go from idea to working product in days, not months, while the architecture and judgment stay mine. My last startup Tempo got into the Colosseum accelerator and raised \$250k, one of ~10 teams picked worldwide. Before that I built a Solana token-intel Telegram bot with 1.5M+ uses and ~\$10M volume. Winner of every in-person hackathon I've attended, frequent speaker at Solana events.

Experience.

Co-founder & CEO

Tempo Trade / 04.2025 - 05.2026

- Co-founded a non-custodial automated trading platform on Solana. Raised \$250k via the Colosseum accelerator (1 of ~10 teams selected worldwide).
- Built trading bots, indexers, and real-time market data pipelines.
- Shipped the AI Setup Assistant for chat-based strategy configuration.
- Stack: Rust, TypeScript, Node.js, Next.js, Solana.

Software Engineer

Perps.ai / 12.2023 - 06.2024

- Built real-time trader analytics hub across DEXs.
- Stack: Next.js, TypeScript, Ethers, Solidity.

Software Engineer

TVL Labs / 12.2022 - 04.2023

- Worked on Hadouken, a borrowing/lending and DEX platform.
- Stack: Next.js, TypeScript, Redux.

Achievements.

2025

- Colosseum Eternal · Sol Statz
- Colosseum Accelerator Cohort 3
- Helius Redacted Hackathon · 2 tracks
- 3rd Place · Sonic Mobius Hackathon
- 2nd Place · VC Day Krakow
- Superteam Poland Grant
- Solana Turbin3 Q2 Builders Program

2024

- 1st Place · ETH Warsaw Hackathon
- 1st Place · DegenHouse Hackathon
- Superteam Blink Instagrانت

PROJECTS

Tempo Trade

2025 - 2026

Co-founded a non-custodial automated trading platform on Solana, with trading bots, indexers, real-time data pipelines, and a chat-based AI Setup Assistant.

Sol Statz

2025

MEV and on-chain trading analytics on Solana. Evolved into Tempo.

Sonic Trade

2025

All-in-one trading platform from Sonic SVM Mobius Hackathon. 3rd Place.

Blinks Deals

2024

Real-time Solana blinks deals notifier from the Colosseum Hackathon.

EXPERTISE

Building with AI (Claude Code, AI agents, MCP)

Rust

TypeScript / Node.js

Next.js

Python

Solana / SVM

EVM / Solidity

Real-time data pipelines

Trading bots, MEV analytics
